

UNIVERSAL STATE of EARTH (USE)
SUPREME COUNCIL of HUMANITY
Secretariat

Life's purpose is life with purpose

UK, London, February 27, 2016

ref. yal/sd/in – 7/2354

"Peace cannot be achieved by force...
it can be achieved by understanding".

Albert Einstein

To whom it is concerned

Dear co-inhabitants of the Earth,

We wish to inform you that the first historical summit meeting of the Supreme Council of Humanity (SCH)'s members will be held on October 5 - 7, 2016 in Athens, Greece. Among other important questions the following Universal DECLARATION will be discussed and approved:

Universal DECLARATION of illegality of wars on Earth

Draft

Preamble

According to estimations of scientists-historians, in the history of mankind more than 15 thousand wars occurred, during which up to 3.5 billion people were killed. We can say that humanity has always fought during all its history. It is calculated that over the last 5.5 thousand years, people have lived in peace only some paltry 300 years, that is, in each century, civilization has been at peace for only a week.

Thus, the inhabitants of the Earth have always tried to destroy his own kind, inventing for this increasingly sophisticated ways. From stone clubs, spears and bows to atomic bombs, combat gases and bacteriological weapons. All this is aimed to one goal — to destroy in the most rational way as many as possible similar others - men in the Prime of life, women, elderly and children.

Wars can be classified as "before nuclear" and "nuclear" age. Bloody apotheosis of the "before nuclear" type of wars was bloody madness of the First world war, during which 10 to 15 million people were killed.

Further development of weapons and the emergence of new types of combat aircraft and tanks, as well as upgrading of communications, improvement of logistics, and other innovations have led to the conversion of military hostilities to wars of the fourth generation — which was the Second world war, where about 60 million people were killed. As a result of organized violence in the twentieth century altogether up to 200 million people were killed. The end of the war was marked by the invention of thermonuclear weapons and the beginning of the "nuclear" period of potential wars. Experts assert that in a thermonuclear war there will not be either winners or losers.

In the twenty-first century that has just started, arms race continues, and the danger of the Third world war is even greater than ever. Nuclear scientists, including 19 Nobel Laureates, on their symbolic Doomsday Clock leave for the second running year only three minutes before the occurrence of global catastrophe of the human-caused "doomsday" - the full destruction of Mankind and the end of civilization as we know it. Pope Francis also believes the situation in the world is so serious that the Celebration of Christmas in 2015 he considered as the last event of such kind.

Indeed, in many countries there is a further modernization of high-precision weapons and the ability to kill at a distance - so-called non-contact wars.

In this regard an objective becomes already not only the destruction of the enemy troops, but of all infrastructure of the state as a whole, including life-support facilities on its territory. The notion of "rear" in the current understanding of wars with such tactic simply does not exist. In the country the entire infrastructure is being destroyed, including its population. The state with its institutions simply terminates to exist.

If the situation comes up to the use of nuclear weapons, the probability of occurrence on the planet of "nuclear winter" is increasing, when for decades, year-round temperature on the planet will decrease to -40, -50 gr. Celsius. It will cease to exist on planet Earth, but almost all living creatures.

However, "nuclear winter" can start not only due to the use of nuclear weapons by one of the belligerents, but also because of undermining of some warehouse with nuclear arsenals by terrorists as a means of their moving to "Paradise".

Unfortunately, the Humanity is unable to solve these problems on the national level, even with the help of the UN.

Therefore, on October 7, 2015 at the Constitutional Convention in Athens, Greece the **Universal Constitution of Earth** was adopted. According to this Constitution, all inhabitants of Earth are suggested through studying of the Minimum of modern civic knowledge to raise the level of their consciousness and become Citizens of Earth-XXI. Both UNESCO authorities and the UN Secretary-General also appeal in recent years to the inhabitants of the planet to foster the sense of global citizenship.

Following the adopted Constitution, the governing bodies of the supranational Universal State of Earth (USE) have started to be created with the Supreme Council of Humanity (SCH) on top of the administrative structure staffed of the most intelligent, wise, moral, fair, with sense of global responsibility citizens of the Earth.

So, at the first SCH meeting among others also this DECLARATION will be adopted with the appeal to all inhabitants of the Earth:

1. From the moment of adoption of this Declaration to consider all wars as a way of solving conflicts and achieving regional and geopolitical purposes, illegal !
2. To consider all military conflicts and war actions as a violation of civil peace and tranquillity and to equate them to civil wars that are not permissible in the single, global, supranational State of USE.
3. Further development, production, trade and use of any deadly weapons, especially weapons of mass destruction, including nuclear, bacteriological, chemical, climatic, etc., should be considered as a crime against mankind and Nature.
4. Inhabitants of the Earth involved in such detrimental to Humanity and Nature activities, should be reckoned as unreasonable, immoral and irresponsible, i.e., with defective consciousness, and sent to the Earth Tribunal to determine the degree of their

guilt in crimes against Humanity and Nature. Those found guilty should incur severe punishment, specified by the Tribunal, and undergo an appropriate civic education.

5. To stop everywhere on planet Earth all war conflicts, the production and trade of armament. Released as a result of this funds in budgets of national States to spend on the civic education of population, health care, their enlightenment, environmental protection-recovery work, and common good.

Thus, if your current life and your own future are important for you, as well as the future of your family, your children, of future generations in general, we suggest you to support the above Universal DECLARATION by joining Earth-XXI Citizenship - <http://glob-use.org/eng/socr-sch/wcznrq.htm>

In order to gain the positive result quicker, please, do send the Declaration text to all your friends, relatives and colleagues, to all contact you know. The details are at - <http://glob-use.org/>

We thank you for understanding.

Regards,

SCH Secretariat
